

- aqueous pigment preparations
- free of binders and solvents
- homogeneous
- highly concentrated
- optimal particle size
- non ionic and/or anion-active additives
- the majority are resistant to drying out and freezing
- good compatibility with wide variety of aqueous binders
- wide variety of application forms
- wide selection of organic and inorganic preparations
- VOC-free series
- the preparations are available with a range of fastness properties (weather/temperature) depending on the application required

Preferred applications:

Paints and varnishes industry: wood print inks, stains, dispersion paints and varnishes, industrial varnishes, paints, varnishes, fillers, full-tone pigments for dispersion colours, wood varnishes, interior and exterior wood coatings, artist's paints (acrylic), hobby paints, full-tone paints., road marking paints, finger paint, special paints for mouth painting, tinting systems, glass varnish

Printing inks industry: Flexographic printing inks, printing inks, printing inks for cardboard articles and paper, printing inks for tissue, printing inks for packaging, wallpaper printing inks, flooring printing inks (e.g. for linoleum)

Building industry: acrylic and silicate plaster, silicone plaster and paints, buildings, building protection, wood protectant, polyvinyl acetate and acrylic based dispersions paints, various adhesives and flooring compounds

Leather industry: leather colours

Paper and paints: decorating paints, paper, tissue

Plastic industry: plastic casings (phono, mobile telephones), glues

Food and textile industry: textile dyes, viscose, textile auxiliaries (finishing agents, additives)

Automobile industry: interior paints for cars

Office supplies industry: writing inks

Chemical industry: polyester filler, pressure plates, parting agents,
