

- colouration of epoxy resins
- carrier material is a bisphenol A/F resin and a reactive thinner (if necessary)
- readily compatible with all epoxy systems
- high colour strength
- viscosity is adjustable
- a range of fastness and durability properties are available, depending on end-use requirements
- organic and inorganic preparations are available

Preferred applications:

Building industry: industrial floor coatings, epoxy resins

Plastic industry: pipe sheathing (coating technology), moulds and tools making,, technical articles

Colour Index	Product name	Pigment content
PB 15:3	Vocaplast-EP Blue	25 %
PB 29	Vocaplast-EP Ultramarine Blue	60 %
PG 17	Vocaplast-EP Oxide Green	60 %
PG 7	Vocaplast-EP Green	30 %
PO 34	Vocaplast-EP Orange 34	20 %
PR 101	Vocaplast-EP Oxide Red (blueish, yellowish)	60 %
PR 112	Vocaplast-EP Red	30 %
PR 122	Vocaplast-EP Pink	20 %
PR 254	Vocaplast-EP Red	35 %
PV 23	Vocaplast-EP Violet	23 %
PY 13	Vocaplast-EP Yellow 13	25 %
